PRODUCT GUIDE

SAFETY FOOTWEAR

The DeWALT range of safety footwear has been designed for the professional tradesman.

The range of shoes includes water resistant injection moulded boots for heavy outdoor ground work as well as light weight flexible low cut shoes designed for indoor workers such as plumbers, electricians, carpenters and floor layers.

Many models have composite toe caps and non metallic midsoles which offer a lighter and more flexible shoe whilst offering all the required protection tested to EN ISO 20345.

It is important that you chose the right shoes with the right level of protection needed for your job. Below is a guide to the standards and levels of protection offered under the different categories of safety footwear.

The footwear protects the wearer's toes against risk of injury from falling objects and crushing when worn in industrial and commercial environments where potential hazards occur with the following protection plus, where applicable, additional protection.

Impact protection provided is 200 Joules.

Compression protection provided is 15,000 Newtons.

Additional protection may be provided, and is identified on the product by it marking as shown:

Categories of safety footwear:

Category	Type (*I) and (**II)	Additional Requirement
SB	I II	Safety basic requirements
S1	I	Closed seat region Antistatic properties Energy absorption at the seat region
S2	I	As S1 plus Water penetration and absorption of the upper Construction
S3	I	As S2 plus Penetration resistance Cleated outsole
S4	II	Antistatic properties Energy absorption at the seat region
S5	II	As S4 plus Penetration resistance Cleated outsole

* Type I footwear is made from leather and other materials excluding all-rubber or all-polymeric footwear

** Type II All -rubber (i.e. entirely vulcanized) or all-polymeric (i.e. entirely moulded) footwear

Description	Marking Code
Penetration resistance (1100 Newtons)	P
Electrical properties: Conductive (maximum resistance 100 kΩ) Antistatic (resistance range of 100 kΩ to 1000 MΩ) Electrically insulating footwear	C A I
Resistance to inimical environments: Insulation against heat Insulation against cold	HI CI
Energy absorption of seat region (20 Joules)	E
Water resistance	WR
Metatarsal protection	M
Ankle protection	AN
Upper: Water penetration and water absorption Cut resistant upper	WRU CR
Outsole: Resistance to hot contact	HRO

Marking of product for slip resistance properties	Marking Code
Ceramic tile with sodium lauryl sulphate	SRA
Steel with glycerol	SRB

*Note: Slippage may still occur in certain environments.

TITANIUM DWF-50092-123

6" Taped Work Boot PU/TPU Injection Out-Sole

EN ISO 20345:2011-S3-WR

Upper: Honey nubuck-123
Tan pull up-120

Lining: Hydro-Guard

Insole: Removable dual density PU

Outsole: PU/TPU
Construction injection moulded

Sizes: UK 6-12 EU 40-46

FEATURES

- Hydro guard bootie lining
- PU/TPU out-sole
- Premium water resistant leather
- Injected sole
- Removable dual density PU comfort insole

BENEFITS

- Wicks sweat away and keeps feet dry
- Light weight, flexible,
- Keeps feet dry
- Strong bond to upper
- All day long comfort with moisture wicking properties

TUNGSTON DWF50094-133

10" Waterproof Rigger Boot on PU/TPU Injection Out-Sole

EN ISO 20345:2011-S3-WR

Upper: Brown buffalo leather

Lining: Hydro-Guard

Insole: Removable dual density PU

Outsole: PU/TPU
Construction injection moulded

Sizes: UK 6-12 EU 40-46

FEATURES

- Hydro guard bootie lining
