Centre Punches Round Head

CP

Carbon steel single piece construction with round shank and round striking head

Accurately hardened and tempered so that the point will withstand continuous use and the striking end will not splinter

Clean and well cut knurling for non-slip and positive finger grip

Working tip centred and ground to the correct angle (90° included angle) for increased efficiency in marking

Rust inhibiting black oxide finish

Ideal for clearly marking metal in work layout & making indentations in a work piece before drilling to ensure correct location of drill points

Automatic Centre Punch

ACP

Fully automatic single hand operated spring loaded punches

No Hammering - built-in mechanism delivers a punch just with the pressing of the head.

Variable depth impression simply by turning the knurled head. Screwing the cap downwards produces heavy indentation; progressively lighter marking can be obtained by screwing the cap upwards

Once the knurled cap is set to the desired position, the punch will strike the same depth every time

Round shank with clean and well cut knurling for positive non-slip grip

Tips are made from hardened tool steel and can be easily removed for re-sharpening or replacement
