35 JUNIOR SAW — BABY BITE <P12>

ESP Arco sierra junior
FR Scie a decouper
DE Junior -Metallsägebogen

This is a tough junior saw designed to provide the handyman and the professional, the best means for coping with small sawing applications.

The compact steel frame is light, yet strong and has a blade tensioning device that locks when the correct blade tension is reached. Ergonomically designed pistol grip handle is made from high quality ABS plastic and comes in attractive colours. The saw comes complete with a 6" (150 mm) blade
